FEATURES

FLOORGUARD 1000 SL

: Floorguard 1000 SL is a heavy duty floor coating for concrete, base on non-solvent epoxy resin with smooth and self leveling property. Use for protecting and sealing new or existing concrete floors, easy washed and cleaned, no dust, impact resistance, chemical resistance and have MICROBAN for protect bacterial. As a topcoat for concrete floor in chemical plants, warehouse, factory, cagewash areas, chemical processing plants, warehouse, factory, food and beverage plants.

TECHNICAL INFORMATION								
Туре	: Epoxy / Polyamide Solvent Free finish topcoat							
Color	: White and other							
Film appearance	: Gloss							
Specific gravity	: 1.17 <u>+</u> 0.05							
Solid by volume	: 100%							
Flash point	:>100 °C							
		Minimum	Maximum	Recommended				
Dry film thickness	(Microns)	1000	2000	1000				
Wet film thickness	(Microns)	1000	2000	1000				
Theoretical coverage.	m ² / Liter	1.0	0.5	1.0				
	m ² / Gallon	3.8	1.9	3.8				
Practical coverage.	m ² / Liter	0.9	0.45	0.9				
	m ² / Gallon	3.4	1.7	3.4				
	Remark : Actual Surface coverage will depend on surface irregularities, Mixing, Application Condition							
	method and tec	method and technique; as well as the structure and dimensions of the object to be coated.						
	Temperature	25 °C	30 °C	35 °C				
Touch dry	Surface dry	4 hrs.	3 hrs.	2 hrs.				
Recoat dry	Hard dry	18 hrs.	16 hrs.	12 hrs.				
Full cure	Minimum	18 hrs.	16 hrs.	12 hrs.				
	Maximum	5 days	5 days	5 days				
Potlife		45 mins	30 mins	20 mins				
	Remark : Drying times are generally related to air circulation, temperature, film thickness and number							
	of coats, and w	of coats, and will be affected correspondingly.						
FILM PERFORMANCE								
	Properti	ies	Test Method	<u>Criteria</u>	Results			
	Adhesion		ASTM D 3359	5B	Passed			
	Bond Strength	(kg/cm²)	ASTM C190	11	Passed			
	Bond Strength	(kg/cm²)	ASTM C882	135	Passed			
	Compressive S (kg/cm²)	trength	ASTM D695	830	Passed			
	Flexural Streng cm ²)	ıh (kg/	ASTM C348	520	Passed			
	Tensile Strengt	h (kg/cm²)	ASTM D638	186	Passed			
	Shore D Hardne	ess	ASTM D2240	80	Passed

Technical Data Sheet

				Rev. 1 10/2017				
	Chemical Resistance	ASTM D 1308	24 hrs.	Passed				
APPLICATION								
	Mixing Ratio	Part A	Part B	Part C				
	By Volume	2	1	0.8				
	By Weight	2	1	1.5				
	Application Method	Brush / Roller	Trowel					
	Diluted by	No Diluted	No Diluted					
		Short Hair Stiff Nylor	Steel bladed trowel,					
	Applicator	Roller (Stanley)	Pin rake					
	, ppilouoi	Stiff Nylon Brush	or Serrated hand trowel, Spiked roller					
	: Mix Part A, Part B and Part	C, strictly follow mix ratio re	ecommendations and st	ir for 2-3 minutes				
	until							
	the mixture is homogeneous after leave 5 minutes before application.							
	: Thinner No. 31 for cleaning	опу						
APPLICATION SYSTEM								
Surface Preparation								
Floor	: For New concrete – The concrete prior to laying plastic sheets to block moisture from underground.							
	Then it should be left for curing concrete to solid and dry for about 3-4 weeks. Then, clean the surface free from dust, dist, groups and most importantly, the surface is completely dry.							
	free from dust, dirt, grease and most importantly, the surface is completely dry. (Check moisture content must be less than 10%)							
	: For Old concrete - To remove the old paint film which loosely adhesion to as much as possible by							
	Scraping with a shovel or Grinding machine to enhance adhesion. Then, clean the surface free from							
	grease and oil with suitable solvent. Before primer coating should clean all surfaces free from dust,							
	dirt, grease and most importantly, the surface is completely dry. (Check moisture content must be							
	less than 10%).							
	: For Floor Hardener or Surfa							
	: Concrete surface preparati	on by using dust free captive	e blasting units, grinding	g equipment,

FLOORGUARD 1000 SL

Technical Data Sheet

Rev. 1 10/2017

Surface glossy finish : Topcoat Floorguard 1000 SL 1000 microns x 1 coat Recommendation : The proper relative humidity in the work shall not exceed 85% RH. : The temperature of the substrate should be minimum 10°C and at least 3°C above the dew point of the air, temperature and relative humidity measured in the vicinity of the substrate for prevent moisture and water drop on substrate effective adhesion and drying time. HANDLING AND STORAGE Storage condition : The product must be stored in accordance with national regulations. Storage conditions are to keep the containers in a dry, cool, well ventilated space and away from source of heat and ignition. Shelf life : 24 months at 30-35 °C Packaging size Part A : Part B : Part C : Package 1 Gallon Set 1 Gallon 1/4 Gallon 1 Gallon 5 Gallon Set 5 Gallon 1 Gallon 1 Gallon HEALTH AND SAFETY : Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not breathe or inhale mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately. : For detailed information on the health and safety hazards and precautions for use of this product, we refer to the Safety Data Sheet. DISCLAIMER

: The information in this data sheet is given to the best of our knowledge based on laboratory testing and practical experience. However, as the product is often used under conditions beyond our control, we cannot guarantee anything only the quality of the product itself. We reserve the right to change the given data without notice.
